## About This Game

The kingdom of Ember is in need of heroes. The immortal Titans are coming back and they seek to enslave humanity once again. Join Kara and Paul as they overcome all adversary and save the things that truly matters.

Heart of Ember is a simple turn based RPG with a simple story. It is set within a beautiful hand painted 3D world. The game will be released by episodes. The reasoning behind this is because there is only one single developer creating the game. This is the first episode of the series.

I give this game a thumbs up with heavy caveats...

I really wanted to like this game, as it's the first ORK Framework game I've played, and I'm developing a game using the same plugin.

However, there are just some rough edges that made it very tough to enjoy. That, and the fact there doesn't seem to be a new chapter of the game, despite the game finishing on a cliffhanger.

So first, the positives.

- Graphics are nice, though admittedly they are asset store purchases.
- Battle system is adequately balanced
- Has the seeds of a good story

The negatives:

- In the dialogue, there are case issues and a few spelling issues
- The dialogue seems rushed, especially in the second half of the game
- There don't seem to be any real stakes in the story. At one point both characters die, and then they are resurrected and continue on like nothing happened
- The game only has one boss, really, and I didn't even realise it was the boss until after the battle was over. There should have been some different music or something.

Sorry to be so harsh. I didn't feel like my time was wasted playing, but I hope if you ever release the next chapter, you will fix some of the issues that prevented this from being a great game.. Cute little characters, nice story, and a sweet hand painted world. Though the lack of directions during battle was a little challenge. It's a nice little game =). Decent enough so far\ very basic UI with no tooltips or explanations. Hard to know what's going on in combat with no descriptions of whatever effect you are under, and the random encounters are a bit too frequent for my tastes. Good enough for 5 shekels I guess. OI VEY. Played about an hour so far. It's decent for its price. The graphics are nice (characters and world). Story seems decently written as well.
